# 700i Digital Booklet System

The 700i Digital Booklet System integrates the DSF-2200 Sheet Feeder with the DBM-700 Bookletmaker, providing a more affordable option for digital print jobs. It offers full-bleed trimming and square spine options with the capability to produce 50-sheet booklets.

Ideal for medium to longer runs, the 700i delivers up to 3,272 booklets per hour.

## AUTOMATED SETTINGS AND CHANGEOVERS

Improve overall efficiency with fully automated settings that are managed entirely from a PC station. Utilizing the PC Controller software, you can set up jobs in under 60 seconds. Simply select or enter a custom paper size and the PC Controller will automatically set the stitch, fold, and trim setting. Any fine-tune adjustments can be made with ease.

Use the computer's memory to save an unlimited number of jobs and retrieve them as needed. Changeovers from one size to another are performed within seconds and without any intervention or tooling required.

The 700i also comes included with a 1-year subscription of Duplo+ Insight, a cloud-based system that captures real-time data from the bookletmaking system. The dashboard provides a quick overview of the status and performance while analytical graphs and reports provide insight for better decision making.

## NEAR-LINE SHEET FEEDING

Process output from your digital presses with great efficiency. The DSF-2200 Sheet Feeder provides an upper and lower bin with air suction feed technology and front/side air separation for reliable performance. Both bins can be used to feed the cover and inner sheets or to feed covers separately. Various paper types and weights can be fed up to 14" x 20" – or up to 9.05" x 24" with the optional Extension Tray Kit.

The DSF-2200 comes equipped with an anti-static device and an ultrasonic sensor to detect any misfeeds or double feeds. It also comes with an End Mark Reader to process documents with variable sheet counts. Optional barcode reader kits can be added to read 1D and 2D barcodes to identify each set and verify that each set is fed in the proper sequence.

## PERFORMANCE BOOKLETMAKING

Maximizing efficiency in bookletmaking saves your business both time and money. The DBM-700/T integrates the stitcher, folder, and face trimmer into one automated system – eliminating the task of setting and folding signatures separately.

As each set is fed, the system guides it through the stitching and folding sections. Equipped with 2 Hohner stitch heads, the DBM-700 can apply 2 or 4 stitches. The automated stitch function enables the stitch heads to cycle twice per booklet and automatically change the position of the stitch heads after each cycle. Easily switch from 2-stitch booklets to 4-stitch jobs without any retooling.

The 4-stitch kit option is available when productivity is priority. The bookletmaker automatically positions the stitch then adjusts the fold roller gap and trimmer transport belts according to the thickness of the booklet. Booklets are trimmed at the fore-edge for a clean finish.

## FULL-BLEED TRIMMING OPTIONS

The DKTS-200 Two Knife Trimmer provides head and foot trimming for full-bleed finished booklets. An optional gutter cutter can be added for 2-up finishing capabilities. The gutter cutter along with the 4-stitch capability double the productivity of small format jobs up to 9,600 booklets per hour.

The DBM-HSC High Speed Creaser offers an optional slitting module to deliver full-bleed finished booklets. Creasing the cover and innermost sheets prior to folding prevents toner cracking. The slitter trims the head and foot to eliminate the task of pre-cutting the sheets on a guillotine.

\*Configuration with the DBM-HSC will be available Q1 2024.

## SQUARE BACK OPTION

The DBM-700S adds a square spine finish to deliver thicker, flatter books. Square spine booklets lay flat and make packing more efficient, saving you money. Enhance the appearance and produce value-added booklets up to 50 sheets/200-page booklets with a perfect bound look in-line with the DBM-700S Square Spine, the fastest in the market.
