Desktop Digital Sleeking Made Easy

The DFL-200 Xpress Foil is an enhancement solution for small print shops, franchises, and digital printers looking to elevate their offerings without breaking the bank. Compact and cost-effective, the DFL-200 adds metallic effects to your digital prints on demand.

IDEAL FOR SHORT RUNS AND CUSTOM JOBS

Designed for digital runs, the DFL-200 allows you to apply toner-reactive foil using a simple sleeeking process to produce eye-catching effects for value added to business cards, invitations, certificates, and other applications in-house.

WHAT IS SLEEKING?

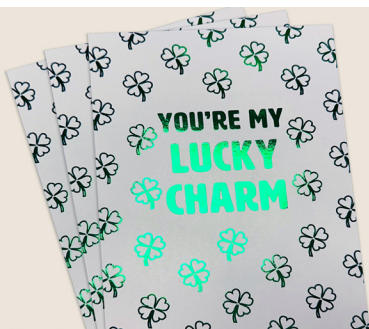

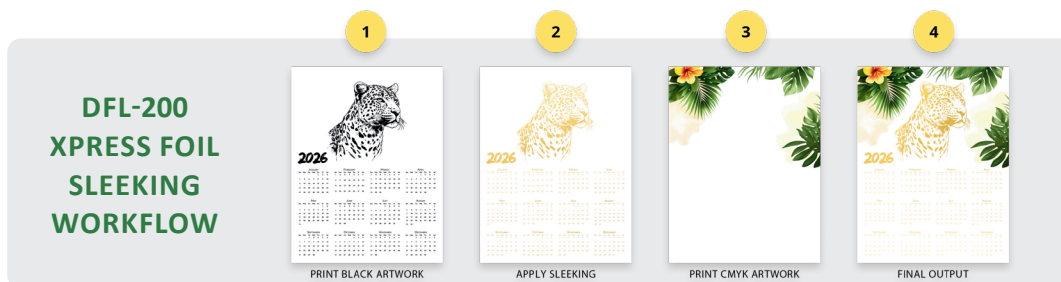

Sleeking, also known as digital or toner foiling, is a straightforward two-step process that fuses foil to digital toner on your prints using a heated roller. The integrated Automatic Document Feeder (ADF) is a key upgrade that transforms your sleeeking workflow. Whether you're processing short runs or medium volume jobs, the ADF ensures hands-free consistent feeding, perfect alignment and

reduced manual handling. The synchronize speed control ensures a smooth transfer of foil at every pass on coated and uncoated media.

HERE'S HOW IT WORKS:

1. **Design & Print:** Print the artwork to be foiled in 100% black toner (K) using your digital press.
2. **Foil & Finish:** Load your foil roll of choice - whether metallic, matte, or holographic - and let the DFL-200 heat up to at least 135°F. Load the printed sheets into the Automatic Document Feeder (ADF) and begin the process. Temperature and speed can be adjusted as needed.

Once the foil is applied, you can print additional CMYK alongside the foil or move it straight to trimming, folding, or other finishing. With the DFL-200, you can turn everyday digital prints into premium products. It's short-run friendly and ideal for one-offs, prototypes, and personalized jobs.

Wedding Applications

Tickets & Invitations

SPECIFICATIONS	
Model	Tabletop foiling with automatic document feeder (ADF)
Feed System	Automatic friction bottom feeder
Feed Capacity	Up to 15 sheets
Minimum Paper Size (WxL)	8.5" x 11"
Maximum Paper Size (WxL)	13" x 26"
Maximum Speed	15 ppm on 8.5"x11"
Paper Weight	110-350 gsm
Operation Panel	Manual speed and heat adjustment
Warm-Up Time	4-5 minutes
Consumables	Metallic foil rolls (1" Core) available in: Gold, Matte Gold, Silver, Blue, Green, Red, White
Dimensions (WxDxH)	44" x 19" x 11"
Weight	Main Body: 42 lb Complete with Accessories: 53 lb
Power Requirements	110-115V, 3A
